KK Manzil, Mananthavady PO (670645), Wayanad, Kerala, India

PROFESSIONAL SUMMARY

Full-stack Flutter Developer with **5 years of experience** building scalable mobile and web applications. Experienced in managing and delivering multiple projects end-to-end with a strong focus on **performance, user experience**, and timely execution. Skilled in **Flutter/Dart, Firebase, REST APIs, GraphQL**, State Management (**Bloc, GetX, Provider**), **Clean Architecture, React Native, Node.js**, and **Native Android (Kotlin)**. Freelance experience includes managing end-to-end project lifecycles: planning, estimation, budgeting, client communication, and final delivery.

TECHNICAL SKILLS

Mobile Development: Flutter, Dart, React Native, Kotlin (Android), Jetpack Compose, XML, Xcode

State Management: Bloc, GetX, Provider, MVC, MVVM, Clean Architecture

Backend & APIs: Node.js, RESTful API, GraphQL, WebSocket, Firebase, MongoDB

Tools & Platforms: Git, GitHub, BitBucket, Jira, Zoho, Postman, Figma, Altair GraphQL Client

Payments: Stripe Payment Gateway, RazorPay Payment Gateway

Deployment: App Store Deployment, Play Store Deployment, Pub.dev

Other Skills: Team Management, Code Review, Problem Solving, Open-Source Contributing

PROFESSIONAL EXPERIENCE

Leader IT Group

Senior Flutter Developer

Saudi Arabia (Remote) | Oct 2025 – Present

Madhina Automax 2.0

- Madhina AX2 is a centralized service application developed for officials in the Madhina region to efficiently manage and monitor urban infrastructure and public services.
- Used **GetX** for state management.
- Owned the entire leadership of the project.

Pub.dev / GitHub

Flutter Freelancer & Open-Source Contributor

Nov 2024 – Oct 2025

Wuup Ecommerce (Monolithia)

- E-commerce app based on **Bloc State Management** and **Clean Architecture**.
- Integrated **Adobe GraphQL** as backend.
- Deployed to both **Playstore** and **Appstore**.
- As the sole freelance developer, had the responsibility of developing the entire app from scratch to architecture to development until deployment.
- **Stripe** was the payment gateway.

Trabuwo Ecommerce

- E-commerce app based on **Bloc State Management** and **Clean Architecture**.
- Integrated **Restful API** as backend.
- As the sole developer, had the responsibility of developing the entire app from scratch to architecture to development until deployment.

247Commerce

Senior Flutter Developer

United Kingdom | May 2024 – Oct 2024

Krispy Kreme Logistics App

- Developed and maintained the **Krispy Kreme Logistics App** — logistics app for one of the world's most iconic doughnut brands, helping drivers manage deliveries efficiently across a global network.
- App specifically made for Tablets. Integrated **Restful APIs** along with **offline handling**.
- Error handling and notifying the team using **Sendgrid** service.
- Supports offline functionality for areas with limited connectivity.

DataSpot Technologies

Senior Flutter Developer

Kerala, India | Nov 2022 – Mar 2024

Cityway (Ride Booking App)

- Led the development team for the CityWay ride booking app, ensuring timely delivery of key features.
- Architected the app using **GetX** for state management and **MVC** for a structured and scalable codebase.
- Integrated **Google Maps** for real-time location tracking and route optimization.
- Implemented **WebSocket** for live updates of ride statuses, enhancing user experience.
- Guided the integration of secure payment systems and ride history features.
- Coordinated with cross-functional teams to align technical features with business requirements.

Cityway Pilot (Driver App)

- Led development of the CityWay Pilot app, enhancing driver-side functionality and improving overall ride coordination.
- Architected driver app using **GetX** for state management and **MVC** for a scalable and maintainable structure.
- Integrated **Google Maps** for real-time tracking and optimized routing to improve driver efficiency.
- Used **Firebase Messaging** to send real-time notifications for ride requests, cancellations, and updates to drivers.
- Used **SQLite** for local data storage, allowing for offline access and improved performance.
- Collaborated with the ride booking app team to ensure smooth interaction between rider and driver applications.
- Implemented **WebSocket** for live updates and seamless driver-passenger communication.

Twaddan SP

- Developed and published Twaddan SP, the service provider app for the Twaddan car wash project, successfully launching it on both **Play Store** and **App Store**.
- Utilized **Firebase Realtime Database** for real-time tracking and dynamic updates of order statuses.
- Implemented **RESTful APIs** to ensure seamless integration and communication between the app and backend services.
- Leveraged **GetX** for efficient state management, providing a smooth and responsive user experience.
- Enhanced operational efficiency by enabling service providers to track, manage, and update order statuses in real time.

Tahssin Field Engineer

- Contributed to the development of the Tahssin Field Engineer app, implemented in **Native Android**.
- Gained experience in **Native Android development** by working on various features of the project.
- Developed **RESTful APIs** to enable seamless data communication between the app and backend services.

Magnus Franchise & Magnus Employee Apps

- Developed the Magnus Franchise app, designed to help a mobile mechanic institute manage their employees effectively.
- Developed the Magnus Employee app, focused on providing a user-friendly interface for employees.
- Leveraged **Provider** for state management, ensuring smooth data flow throughout both apps.
- Implemented **RESTful APIs** to list employee details and enable seamless updates.
- Used **SQLite** for local data storage, allowing for offline access and improved performance.

Designfort

Flutter Developer

UAE | Jan 2022 – Oct 2022

Babilsouq

- Developed the Babilsouq app, an e-commerce platform focused on facilitating the buying and selling of used products.
- Employed a pattern similar to **BLoC** for state management, enhancing app structure and maintainability.
- Utilized **RESTful APIs** to enable functionalities for creating products, processing orders, and managing user interactions.
- Designed a user-friendly interface to improve the overall shopping experience for users.

Phygitals Solutions

Flutter Internship

Chennai, Tamil Nadu | Jun 2021 – Dec 2021

Self-Taught

Coding Apprentice (Self-Taught)

April 2021 – May 2021

OTHER PROJECTS

EPM940 (AX2), Helpion, Thozhilali, School, Madhina AX1 (Native Android), Abaa, Health AI Chatbot (React Native)

OPEN-SOURCE CONTRIBUTIONS
