PROFESSIONAL SUMMARY

Full Stack Developer with 2.5 years of production experience building a school management platform and real-time web applications using React, Next.js, TypeScript, and Node.js. Known for delivering scalable UI component systems, real-time Socket.IO architectures, and clean full-stack features with end-to-end ownership in fast-moving product teams.

PROFESSIONAL EXPERIENCE

Full Stack Developer

Nov 2023 – Mar 2026

Arronic · School Management Software · Guwahati, India

- Led end-to-end development of production modules for a school management platform using React, Next.js, and TypeScript — supporting multi-role workflows for students, teachers, and administrators
- Developed and scaled 5+ core production modules to support complex business workflows and role-based operations
- Designed and delivered 20+ reusable UI components with Tailwind CSS, reducing feature development time by 25–30% and improving cross-module UI consistency
- Implemented JWT-based authentication and role-based access control (RBAC) supporting 100+ active users across student, teacher, and admin roles
- Managed complex application state using Redux and Zustand across high-complexity feature modules
- Integrated 10+ REST APIs with robust error handling, ensuring reliable data flow and predictable performance
- Contributed to backend services using Node.js, Express.js, and MongoDB across multiple production releases
- Collaborated cross-functionally with product, design, backend, and QA teams to deliver features end-to-end

PROJECT EXPERIENCE

RhinoChat — Real-Time Chat Application · github.com/bokhtier19/RhinoChat

React · Node.js · Socket.IO · MongoDB · Express · TypeScript

- Built a real-time messaging system with Socket.IO supporting concurrent one-to-one and group chats
- Implemented JWT-based authentication and persistent message storage with MongoDB
- Designed a fully responsive React UI for desktop and mobile with live user presence indicators
- Managed real-time events, user presence detection, and message

synchronization at scale

RhinoMovies — Movie Discovery Platform · rhino-movies.vercel.app

Next.js · TypeScript · React · TMDB API

- Built a server-side rendered movie discovery platform with Next.js for optimal load performance and SEO
- Implemented dynamic routing and real-time search and filtering by category and title
- Integrated TMDB API for live movie data and optimised rendering using Next.js data-fetching strategies
- Deployed on Vercel with production-grade configuration and performance tuning
