PROFILE SUMMARY

Flutter Developer with 4+ years of experience building scalable, high-performance Android and iOS applications using Flutter. Expertise in MobX, Firebase, REST API integration, Google Maps, payment gateway integration, and real-time systems. Delivered 20+ production-ready mobile applications across startups and client projects with strong focus on clean architecture, performance optimization, and seamless user experience. Experienced in leading development, managing app releases, and building end-to-end mobile solutions with strong ownership and product thinking.

IT SKILLS

Languages: Dart

Framework: Flutter

State Management: MobX, Provider

Architecture: MVVM, Clean Architecture, Dependency Injection

UI: Pixel-Perfect UI, Responsive Design, Multi-role Apps

Backend & Cloud : Firebase (Auth, Firestore, FCM, Crashlytics)

APIs & Networking : REST API Integration, Dio, WebSocket

Database & Storage: SQLite, Hive

Notifications: FCM, OneSignal, Deep Linking

Maps: Google Maps, Live Tracking

Payments: Payment Gateway Integration

Tools: Git, Android Studio, VS Code

Testing: Postman (API Testing)

Deployment & DevOps: Play Store, App Store, Release Management, CI/CD

Methodologies: Agile/Scrum

Special: Text-to-Speech, Bluetooth/IoT, Real-time Chat & Data Handling

EXPERIENCE

Softwaregiant, Noida, UP

Lead Flutter Developer | Aug 2024 – Present

- Leading end-to-end Flutter development for client and in-house products.
- Architecting scalable mobile solutions with Firebase and REST APIs.
- Managing code quality, performance optimization, and app release cycles.

MeetMighty It Solutions, Rajkot, Gujarat

Flutter Developer | Oct 2023 – Jul 2024

- Built client apps with API and Firebase integration from scratch.
- Improved app performance achieving 20% memory optimization.
- Worked on multi-role app features for customer and delivery partner workflows.

Mechodal Technology, Bhavnagar, Gujarat

Flutter Developer | Sep 2022 – Oct 2023

- Developed and deployed 3+ production Flutter applications with Firebase and REST API integrations.
- Led team efforts in feature planning and code reviews.
- Reduced crash reports and improved app stability by resolving production-level issues.

Simulas Technologies, Ahmedabad, Gujarat

Mobile Application Developer | Jan 2022 – Sep 2022

- Integrated REST APIs for real-time systems and data synchronization.
- Contributed to internal PMS product feature development.

EDUCATION

Master of Computer Applications | 2020 – 2022

Government MCA College (GMCA) – GTU, Ahmedabad

Bachelor of Computer Applications | 2017 – 2020

Svccs – MKBU, Bhavnagar

MAJOR PROJECTS

Project: GV Ride – Taxi Booking App (Malaysia)

Technologies and Tools: Flutter | Google Maps | MobX | Firebase (Auth, FCM) | REST APIs | Payment Gateway | Real-time Chat

- A Malaysia-based ride-sharing platform with 10K+ downloads, developed as a dedicated Flutter developer via Softwaregiant, enabling riders to control pricing, driver selection, and ride experience.
- Implemented a unique negotiable fare system allowing riders to set their own price; drivers receive fare notifications and accept based on their preference.
- Built driver selection functionality enabling riders to browse and choose their preferred driver for a journey.
- Integrated Google Maps for real-time driver tracking, live location updates, and route visualization.
- Integrated multiple payment options and a secure payment gateway for flexible and seamless transactions.
- Implemented push notifications via Firebase FCM for ride requests, fare updates, driver acceptance, and trip alerts.
- Built Reviews and Ratings system for both riders and drivers to maintain service quality and trust.
- Delivered a user-friendly, pixel-perfect interface covering the full app flow signup/login, ride booking, tracking, and trip history.

Project: Zap AI (Practice Speaking English)

Technologies and Tools: Flutter | Firebase (Auth, Firestore, FCM) | MobX / Provider | REST APIs | TTS | Bluetooth | OneSignal

- An AI-powered English speaking practice application with 5K+ downloads, 4.5★ rating, and 80+ user reviews focused on conversational AI and speech interaction.
- Built responsive, pixel-perfect chat interfaces for smooth conversational flow and user engagement.
- Integrated AI-based REST APIs to enable dynamic, real-time conversational responses.
- Implemented Text-to-Speech (TTS) and speech interaction for pronunciation and speaking practice.
- Integrated Firebase Authentication for secure login and FCM / OneSignal for real-time notifications.
- Worked on Bluetooth-based audio connectivity to support external devices for enhanced speaking experience.
- Optimized rendering and state management with MobX for smooth performance in chat-heavy interactions.

Project: Mighty Delivery (On-Demand Delivery System)

Technologies and Tools: Flutter | MobX / Provider | REST APIs | Google Maps | OneSignal | Payment Gateway

- An on-demand delivery platform with 1K+ downloads supporting customer, delivery partner, and admin workflows with real-time order tracking.
- Developed features for different user roles within a single application architecture, handling complex role-based workflows.
- Integrated Google Maps for live location tracking, route optimization, and real-time order status updates.
- Implemented OneSignal for real-time order alerts and push notifications to customers and delivery partners.
- Integrated payment gateway for secure and seamless transaction processing.
- Used MobX state management to maintain efficient state and improve app scalability.
- Ensured smooth order flow by handling edge cases, resolving bugs, and improving app stability.
