PROFESSIONAL SUMMARY

Motivated and detail-oriented developer with 1 year and 7 months of hands-on experience in cross-platform mobile app development, state management, and backend integration. Proficient in building scalable, high-performance applications with clean code architecture. Experienced in AI-assisted development using ChatGPT and Claude to streamline workflows, debug efficiently, and accelerate delivery. Passionate about creating intuitive user experiences and continuously evolving with modern technologies.

TECHNICAL SKILLS

Mobile Development: Flutter, Dart, Material Design 3, Responsive UI

State Management: Provider | Currently Learning: Bloc, Riverpod

Backend & APIs: REST APIs, Firebase (Auth, Firestore, Cloud Messaging), Razorpay Integration

Local Storage: SQLite, Shared Preferences

Databases: MySQL, MongoDB, Firebase Firestore

AI Tools: ChatGPT, Claude – used for code generation, debugging, and workflow acceleration

Tools & Platforms: Git, GitHub, VS Code, Android Studio, Postman, Push Notifications (FCM)

EXPERIENCE

Flutter Developer (Full-time) – CodeHabit, Gandhinagar

May 2024 – Present

- Developing end-to-end Flutter applications with REST API integration, clean architecture, and role-based module systems.
- Collaborating with cross-functional teams to ship production-ready mobile apps with optimized performance.
- Leveraging AI tools (ChatGPT, Claude) to accelerate development, generate boilerplate code, and resolve complex bugs faster.
- Implementing state management using Provider while maintaining scalable project structures.

Flutter Developer Intern – Infydots Technologies, Rajkot

3 Months (2023)

- Built foundational Flutter applications with Firebase integration and REST API handling.
- Gained hands-on experience in responsive UI design and app performance optimization.

PROJECTS

1. Team Collaboration & Chat App

Tech: Flutter • Provider • SQLite • Firebase FCM • REST API

- Built a Flutter app with three core modules: Chat, Task Management, and Daily Work Tracking.
- Chat module supports one-to-one and group messaging, media sharing, and offline sync using SQLite.
- Task & Daily Work module: assign tasks, track work hours, and trigger push notifications via FCM.
- Used Provider for state management across all modules with a modular, scalable architecture.

2. Role-Based Management System (Chemical Company App)

Tech: Flutter • REST API • Shared Preferences • Provider

- Built a Flutter app with role-based access for Sales, Sales Head, Admin, Accounts, HR, and Support teams.
- Developed features including product inquiries, dynamic admin panel, and task assignment workflows.
- Integrated Shared Preferences for session management and REST APIs for real-time data sync.

3. Sports Turf Booking App

Tech: *Flutter • Razorpay • REST API • Material Design 3*

- Developed a full-featured Flutter app for turf owners to manage services, availability, and dynamic slot pricing.
- Enabled customers to filter by date, view available slots, and complete bookings via Razorpay payment gateway.
- Designed an intuitive, clean UI delivering a smooth end-to-end booking and management experience.

4. Gluco Mate – Blood Sugar Tracker App

Tech: *Flutter • SQLite • Shared Preferences • Provider*

- Developed a personal health app to help users log and monitor blood sugar levels consistently.
- Implemented local data persistence using SQLite for offline-first functionality with no data loss.
- Used Shared Preferences for user settings and onboarding state management.
- Built a clean, user-friendly UI focused on simplicity and ease of daily health tracking.

EDUCATION

Bachelor of Engineering – Computer Engineering

2021 – 2024

Government Engineering College, Rajkot | CGPA: 7.04

Diploma in Computer Engineering

2018 – 2021

Christ Polytechnic Institute, Rajkot | CGPA: 9.24
