• Ahmedabad, India

Summary

Flutter Developer with 2+ years of experience building scalable mobile applications using Flutter, Firebase, and REST APIs. Experienced in multi-role architectures, booking systems, and real-time data handling. Focused on clean architecture, performance optimization, and production-ready deployments.

Experience

Hyperlink Infosystem Pvt Ltd

Ahmedabad

Software Development Engineer

01/2024

A software development company focused on innovative digital solutions

- Developed and deployed two live mobile applications on the Play Store — a dating app and an EV charging station app — using Flutter and Firebase with secure authentication and real-time data handling.
- Implemented BLoC architecture in the EV charging station app to ensure scalable state management and maintainable code structure.
- Built a multi-role dog services platform (user, vendor, staff) using MobX state management, integrating REST APIs, push notifications (FCM), payment gateway, and in-app purchase modules.
- Improved application performance by 30% through optimized state management and code refactoring.
- Managed production releases, resolved critical bugs, and handled Android/iOS build configurations (Gradle, CocoaPods) following Clean Architecture (MVVM) principles.

Education

GLS University

Ahmedabad

M.Sc. Information Technology

01/2022 - 12/2024

M.G University

Kerala

B.Sc. Information Technology

01/2019 - 12/2022

Skills

Mobile: Flutter, Dart

Backend: Firebase • REST APIs • FastAPI • PHP

State Management:: BLoC • GetX • RiverPod • Provider • Mobx

Tools & IDEs: Git • AntiGravity • Android Studio • VS Code • Cursor

Database & Storage: Firestore • MySQL • SQLite • Hive

Projects

Freelance Projects

01/2024 - 03/2025

A series of freelance and personal projects demonstrating proficiency in app development and web technologies

- News web app: Flutter app with login, profiles, and comments
- Developed a news application with user authentication, profiles, and comment functionality.
- Integrated REST APIs for content management.
- Designed responsive layouts for multi-device compatibility.
- Admin dashboard & APIs: REST APIs using FastAPI & SQLAlchemy
- Portfolio website: Responsive site with Flutter web, hosted on Vercel
- E-Grain app: Full-stack e-commerce app (Flutter + PHP/MySQL)

Personal Projects

2023 - Present

Built and experimented with cross-platform Flutter projects in personal time to strengthen UI responsiveness and API integration skills.

- Developed a responsive portfolio web application using Flutter Web and hosted it on Netlify.
- Ensured cross-platform compatibility (Web, Mobile, Tablet, Desktop).
- Built a money manager app using Flutter and Firebase for real-time expense and transaction tracking.
- Designed a clean and user-friendly UI for financial tracking.
- Currently working on AI-based expense analysis and smart financial insights integration.
