## About Me

I am a dedicated and results-driven Software Engineer with 2 years of professional experience specializing in **React.js** and **Node.js** development. I am passionate about delivering high-quality, efficient, and scalable solutions. I continuously seek opportunities to learn new technologies and improve my skill set. My goal is to contribute to impactful projects while growing as a developer and team member.

## Professional Experience

*Hyperlink Infosystem*

*July 2023 – Present*

### Health & Wellness Platform

- Contributed to the frontend development using React.js. Integrated ChatGPT chatbot, Google Maps and address auto-suggestions.
- Enhanced Amazon Affiliate functionality and worked on other supporting modules.
- Focused on delivering a smooth and user-friendly experience.

### Healthcare Platform

- Contributed Assisted in building and improving the platform using React.js and Node.js.
- Integrated services such as AWS Chime (video meetings), Isabel and Binah. Introduced new features and integrated other modules to strengthen the application.
- Ensured modules worked reliably while maintaining scalability and performance.

### Lead Management System

- Developed and maintained the admin panel using React.js and Node.js. Designed and connected APIs with Sequelize ORM and integrated related modules.
- Implemented real-time chat functionality with Firebase. Contributed to performance improvements and new feature development.
