PROFESSIONAL SUMMARY

I'm innovative **Full Stack Developer** with **4+ years** of extensive experience in the software development lifecycle. Proficient in a diverse tech stack including **React.js**, **Next.js**, **Node.js**, **Python**, and **PostgreSQL**, **MongoDB**. Demonstrated success in architecting complex multi-tenant and modular application, integrating AI/LLM technologies, and delivering high-performance solutions for international clients.

EXPERIENCE

Software Engineer - (FullStack)

NexusLink Services India Pvt. Ltd

Feb 2025 - Present

Ahmedabad, India (Onsite)

- Developed a robust backend and admin panel for a food truck management system for an international client, utilizing **React**, **TanStack Query**, **Redux**, and **MUI** for the interface. Engineered the backend infrastructure using **NestJS**, **Prisma**, and **PostgreSQL**, implementing **OpenAPI-generated models** to ensure type safety and accelerate API integration.
- Architected and deployed a multi-tenant AI chat platform for international clients using **LibreChat** and **custom Python-based MCP servers**, managing multiple isolated database connections (PostgreSQL, MongoDB) to enable 1000+ end-users to securely interact with their proprietary data through natural language queries with sub-2-second response times.
- Engineered **persona-based LLM response enhancement system** that dynamically adapts conversational outputs to match individual user communication styles and preferences, **improving user engagement by 45%** and **reducing response refinement iterations by 35%** across enterprise deployments.
- Developed full-stack tax advisory platform using **Next.js**, **Payload CMS**, and **PostgreSQL**, enabling seamless information sharing and data collection between tax advisors and clients through a multi-relational system that streamlined communication workflows and improved document management efficiency by 40%.
- Led frontend development and optimization of U.S. government web application using **React.js**, **Next.js**, and modern JavaScript frameworks, achieving **40% improvement in application performance** and **30% increase in user satisfaction scores** across 10,000+ end-users through code optimization, lazy loading, and responsive design implementation.
- Developed client-facing applications for international clients using **Next.js**, **Payload CMS**, **Tailwind CSS**, **Vercel Postgres**, **Vercel Storage** and **Radix UI** with **cross-timezone technical support**.
- Provided **technical consultation and development support to international clients**, managing requirements and delivering custom solutions using modern web technologies .

Software Developer Engineer 1 - (Fullstack)

Somhako

June 2023 - Jan 2025

Yokohama, Japan (Remote)

- Developed a **SaaS application** from scratch for the **HR industry**, featuring a **marketplace** and **ATS services** to **streamline recruitment processes**.
- Implemented the application using **Node.js**, **Express.js**, **React.js**, **Next.js**, **MongoDB**, and **PostgreSQL** ensuring seamless user experience and high performance.
- Designed and implemented a fully custom authentication system with multi-tenant support using **JavaScript**, **NodeJS**, **ExpressJS**, **NextJS**, and **Typescript** as well Designed and implemented a fully custom components such as **mentions-input**, **AI buttons**, and **HR Globe** using **Shadcn UI** and **Aceternity UI**.

Software Developer Engineer - (Fullstack)

AdvantF

April 2022 - June 2023

Yokohama, Japan (Remote)

- Collaborating with a team of developers to design and implement software solutions for the **Somhako product**, which is an HR industry-related **marketplace and ATS service provider**.
- Developing front-end components using technologies such as **ReactJS, NextJS, Tailwind CSS, Shadcn UI, Headless UI, and Typescript**, back-end apis using **NodeJS, Django and PostgreSQL**.
- Integrate **Novus(Chatbot)** on frontend which gives the data of applicants on the basis of their resume data handles their **sub processes and increase efficiency by 50%**.

React.js Developer Intern

Madiee Games pvt. ltd

December 2021 - March 2022

Chennai, India (Remote)

- Build amazing 2d multiplayer Web games using **ReactJS, Tailwind CSS, HTML, Bootstrap, jQuery, Firebase real time database and Firestore**.

Software Tutor

Institute of Advance Network Technology

Jan 2021 - July 2021

Ahmedabad, India (PartTime Onsite)

- Developed personalized lesson plans and resources that increased **student engagement by 40%**, resulting in a notable improvement in overall class performance metrics and satisfaction ratings.

SKILLS

Languages:	Javascript, Typescript, Python, PHP
Technologies/Frameworks:	ReactJS, NextJS, NodeJS, ExpressJS, Tailwind CSS, Django, React Native HTML, CSS, jQuery, PostgreSQL, MySQL, MongoDB, Firebase, Clerk,
Additional Skills:	Git, GitHub, Gitlab, Linux, Azure, OpenAI, LangChain, Sentry, ESLint, Data Structures and Algorithms, Payload CMS, Librechat, FastMCP, FastAPI

EDUCATION

Gandhinagar Institute Of Technology, Gujarat Technological University	2020 - 2023
Bachelors of Technology in Computer Science and Engineering	8.73 CGPA
Government Polytechnic Ahemdabad, Gujarat Technological University	2017 - 2020
Diploma of Technology in Computer Engineering	9.70 CGPA

CLIENT PROJECTS

Food Truck Management System *Full Stack Developer*
Tech Stack: **React, TanStack Query, Redux, MUI, NestJS, Prisma, PostgreSQL**

- Developed a robust backend infrastructure using **NestJS** and **Prisma** to handle complex fleet operations and inventory management.
- Built a comprehensive admin panel using **React** and **Material UI**, integrating **OpenAPI-generated models** to ensure type safety and accelerate API integration for an international client.

Multi-Tenant AI Chat Platform *Full Stack Developer*
Tech Stack: **LibreChat, Python, MCP, PostgreSQL, MongoDB**

- Architected a secure multi-tenant environment enabling 1000+ users to interact with proprietary data using natural language queries.
- Integrated custom Python-based MCP servers managing isolated database connections to ensure data privacy and sub-2-second response times.

Tax Advisory Platform *Full Stack Developer*
Tech Stack: **Next.js, Payload CMS, PostgreSQL**

- Engineered a full-stack solution facilitating seamless document exchange and data collection between tax advisors and clients.

- Implemented a multi-relational system architecture that streamlined communication workflows and improved document management efficiency by 40%.

PERSONAL PROJECTS

ABAC system

October 2024 - November 2024

Personal Project

[live](#) - [code](#)

- Developed a **React + TypeScript** ABAC Demo with **Clerk Authentication** for secure, fine-grained **access control**. Implemented dynamic **role management** (Admin, Moderator, User) and **local storage** for **data persistence** in a **responsive, scalable UI** designed for real-world scenarios.

Notes App

September 2024 - October 2024

Personal Project

[live](#) - [code](#)

- Built with **React**, **Node.js**, and styled with **TailwindCSS**, Notes **MERN App** is a note-taking platform where users can **create, edit, delete, and organize notes with a tagging system**. Featuring **JWT authentication**, this app showcases the developer's ability to build a **full-stack MERN app** with a **responsive, user-friendly design**.

A Collaborative SyncDocs

January 2024 - March 2024

Personal Project

[live](#) - [code](#)

- Built with Next.js to **handle the user interface**, **Liveblocks** for **real-time features and styled with TailwindCSS**, **LiveDocs** is a **clone of Goole Docs**. The primary goal is to demonstrate the developer's skills in **realtime enviroment that creates a lasting impact**.

Brainwave

January 2024 - February 2024

Personal Project

[live](#) - [code](#)

- Brainwave - Modern UI/UX website, developed using React.js and Tailwind CSS, **exemplifies modern UI/UX principles**. Its sleek design, seamless animations, and overall user experience set a high standard, serving as a reference or inspiration for future modern applications or websites in general.

A Modern Next.js Portfolio

January 2024 - January 2024

Personal Project

[live](#) - [code](#)

- Built with Next.js for **handling the user interface**, **Three.js** for **rendering 3D elements**, **Framer motion** for **beautiful animations**, and styled with **Tailwind CSS**, this portfolio demonstrates the developer's skills in a unique manner that creates a lasting impact.

Academic Performance Index

June 2022 - March 2023

Gandhinagar Institute Of Technology, Gujarat Technological University

[code](#)

- Developed as a **final year degree project** using core PHP, this system offers a **comprehensive and automated solution for tracking faculty activity points** in a college setting. The project is designed to **streamline the evaluation process, ensuring accuracy and efficiency in managing faculty contributions**. It exemplifies the developer's capability in creating robust, data-driven applications tailored for academic environments.

Simple Image to Text

March 2023 - March 2023

Personal Project

[live](#) - [code](#)

- Built with the Vercel AI SDK, Claude, and Next.js, this project delivers **fast image-to-text conversion**, showcasing **AI expertise**.

Task management system

March 2023 - March 2023

Personal Project

[live](#) - [code](#)

- Developed with Next.js 13, TypeScript, Tailwind CSS, and MobX State Tree, this task management app enables **users to manage tasks with full CRUD functionality and local storage for data persistence**.

Django Portfolio

March 2022 - March 2022

Personal Project

[live](#) - [code](#)

- Developed a **dynamic, responsive portfolio** using Django, Bootstrap, jQuery, and JavaScript with dark/light mode support.

Django Todos

February 2022 - March 2022

Personal Project

[code](#)

- Developed a task management system using Django, Bootstrap, jQuery, HTML, CSS, and JavaScript. **Allows users to create, delete, and manage tasks efficiently.**

EduSmart College Management System

June 2019 - March 2020

Government Polytechnic Ahemdabad, Gujarat Technological University

- Developed a student portal management system using core PHP for a **final year diploma project**, showcasing skills in **building comprehensive, data-driven web applications.**

COURSES AND CERTIFICATES

- Geeks for Geeks certified **Front end web development course certificate** - [Link](#)
- star certified **Python certificate**, id: STR21PTN00180319 -[Link](#)
- guvi certified **Game development using python certificate** -[Link](#)
- star certified **PHP certificate**, id: STR21PHP00180347 -[Link](#)
