PROFESSIONAL SUMMARY

Flutter Developer with 1.2+ years of experience building scalable and user-friendly mobile applications. Experienced in Flutter, Kotlin, REST API integration, Firebase, and state management using Provider and GetX. Focused on writing clean, maintainable code and delivering high-performance mobile solutions.

EXPERIENCE

- Openxcell - AI Development PVT LTD, Associate Software Engineer (Flutter Developer)** 08/2025 – Present
- Developing scalable Flutter applications using clean architecture.
 - Implementing Provider and GetX for state management.
 - Working with REST APIs and third-party integrations.
- Doubledotts IT Solutions, Flutter Developer Intern** 12/2023 – 06/2024
- Built mobile UI components using Flutter.
 - Integrated third-party APIs and Firebase services.
 - Contributed to the MFT App development.

EDUCATION

- Master of Computer Application, LDRP Institute of Technology and Research** 08/2024 – Present
CGPA: 9.72
- Bachelor of Computer Application, Veer Narmad South Gujarat University** 08/2021 – 05/2024
CGPA: 8.31

TECHNICAL SKILLS

Languages: Dart, Java, Kotlin

Frameworks: Flutter, Android, Jetpack Compose

Mobile Development: REST APIs, Firebase, SQLite

State Management: Provider, GetX, setState

Tools: Git, GitHub, Android Studio, VS Code, Cursor, Antigravity, Figma

PROJECTS

- Pantry Pal - Inventory Management App (Flutter)** 08/2025 – Present
- Developed a Flutter-based app to manage pantry items and track inventory.
 - Used GetX with MVVM and clean architecture for performance and maintainability.
 - Implemented SharedPreferences for offline access and fast data retrieval.
 - Followed clean code practices with reusable components for scalability.
 - Implemented In-App Purchase (IAP) functionality for subscription plans, allowing users to unlock premium features within the application.
 - iOS App: [iOS](#)
- MFT App (Flutter)** 03/2024 – 08/2024
- Developed a cross-platform mobile application using Flutter and Dart to manage product browsing and ordering features.
 - Implemented real-time order tracking with dynamic data updates to provide users with live order status.
 - Integrated Google Maps Flutter plugin to show the map inside the application.
 - Integrated REST APIs for fetching product lists, order details, and user-related data from backend services.
 - Implemented Firebase services including Authentication, Firestore Database, and Push Notifications (FCM) for secure user management and real-time communication.
 - Implemented error handling, loading states, and API response management to ensure smooth user experience.
 - Optimized app performance by implementing efficient data caching and asynchronous API handling.
- Zrafh App — E-Commerce App (Flutter)**
- Developed a shopping app for baby-care and maternity products with dynamic product listing and authentication.
 - Designed a clean and user-friendly UI.
 - Live App: [Android](#) • [iOS](#)
- Cardixa App — Healthcare App (Android)** 12/2025 – Present
- Implemented secure authentication and patient data protection.
 - Integrated RESTful APIs for medical records and backend operations.
 - Added video call functionality for remote patient-doctor consultations.
 - Integrated iHealth SDK for syncing health device data (BP, glucose, etc.).
 - Built patient intake forms and health history management features.
 - Android App: [Android](#)
