OBJECTIVE

Motivated Flutter developer aiming to create scalable, user-centric mobile applications using modern architectural practices, contribute to innovative product development, and deliver high-quality digital solutions in a collaborative environment.

EDUCATION

Panipat Institute Of Engineering & Technology

B.Tech Computer Science - 8.5 CGPA

Panipat, Haryana

Aug. 2019 – June 2023

EXPERIENCE

Flutter Developer

Sept. 2025 – Present

Vision IAS (AJAYVISION EDUCATION PRIVATE LIMITED)

- Developed the Vision Admin App for faculty, enabling availability scheduling, timetable management, and academic event organization through an intuitive mobile interface.
- Built handout upload and resource management features while designing the application using scalable Flutter architecture focused on performance and usability.

Flutter Developer

Oct. 2023 – Aug. 2025

Samriddhi Automations Pvt. Ltd.

Panipat, Haryana

- Developed a Video Management Software (VMS) enabling live CCTV camera viewing, video playback, and event monitoring for comprehensive surveillance. Solely conceived, designed, and implemented the project.
- Built a Human Resource Management System (HRMS) with location-based attendance, leave application, salary viewing, task assignment, and sales tracking — fully designed and developed end-to-end.

PROJECTS

Sparsh HRMS | *Flutter, Dart, GetX, Rest APIs, Sqflite, Push Notifications* | [Play Store](#) | [App Store](#)

- Developed an HRMS mobile application with location-based attendance, leave management, salary tracking, work-from-home (WFH) logging, sales tracking, and task management features.
- Integrated Firebase notifications and Sqflite for local storage; the app has achieved **1K downloads**.

Vision Admin App | *Flutter, Dart, Bloc, Rest APIs, Push Notifications, MVC Architecture*

- Developed an internal faculty management application allowing teachers to schedule availability, manage class timetables, and organize academic events.
- Implemented handout upload and resource management features to streamline academic workflows while ensuring a scalable and performance-focused architecture.

EatNDine – Smart Dine-In Restaurant App | *Flutter, Dart, Bloc, Hive, REST APIs, OpenStreetMap*

- Developed a dine-in app allowing users to discover nearby restaurants, select location via map, view menus, choose tables, place orders, track live status, and make in-app payments.
- Implemented Bloc for scalable state management, Hive for offline persistence, and MapTiler with OpenStreetMap for interactive location selection.

Video Management Software (VMS) | *Flutter, Dart, Getx, Rest APIs, Sqflite, Push Notifications, Vlc Player*

- Engineered a CCTV app with live video feeds, PTZ controls, and playback features for smart surveillance and event monitoring.
- Designed an intuitive UI for seamless navigation and ensured high performance across low-bandwidth scenarios.

TECHNICAL SKILLS

Technical Skills: C | C++ | DSA | Dart | Flutter | REST APIs | Firebase | Sqflite | Hive | Clean Architecture | HTML | CSS | Bootstrap

State Management: Provider | Getx | Cubit | Bloc

Developer Tools: VS Code | GitHub | Dart DevTools | Android Studio | Bitbucket | Mantis

Soft-Skills: Team Work | Leadership | Problem Solving | Skill Development
